

ESGO Traveling Fellowship Fellows Report

Name of Fellow: ESGO Travelling Fellowship in Obstetrics and Gynecology

Position at Home Institution: Resident in Obstetrics and Gynecology (last year), Tirana, Albania

Home Institution (full address): University Hospital of Obstetrics and Gynecology, "Koco Gliozheni"

Head of the Department: Prof. Orion Gliozheni

Email: www.klinikagliozheni.com

Name of Mentor at Host Institution: Prof. Gerald Gitsch

Position at Host Institution: Gastarztin

Institution (full address): Universitätsklinikum Frauenklinikum, Freiburg

Email: studentensekretariat.frauenklinik@uniklinik-freiburg.de

Dates of Fellowship:

31 May 2014 until 31 July 2014

Detailed description on Teaching received:

1. Surgical interventions (laparoscopic and laparotomies one)
2. Breast cancer interventions (we do not do that in Albania so it was a new and wonderful valuable experience for me).
3. Colposcopic examination (the so-called Displasia in Freiburg Hospital)
4. Doing conisation and Laser for the pathologies of cervix uteri.
5. Normal and abnormal ultrasound examinations.

Goals accomplished :

1. I got in touch with the real medicine practice in an important country of Europe, such as Germany.
2. I was part of the morning and the afternoon meetings done in the Hospital like a real doctor.

ESGO Traveling Fellowship, Fellows Report, January 2014

3. I was part of the discussions for the most important clinical cases in the Hospital.
4. I had the opportunity to know and work with many brave doctors and with a great heart.
5. I had the possibility to improve my German language.

Achievement in clinical practice:

1. I had the possibility to be a part of a large number of surgical interventions as a second surgeon and as an assistant one.
2. I saw many cases of cervix pathologies related to colposcopy.
3. I could see many cases of abnormal pregnancies and ultrasound examinations (in gynecology and obstetrics).

Presentations eg. at seminar or meetings:

I think that doing presentations for that big hospital by a resident like me is not something that could be done in only 2 months.

Research performed and outcome:

Two months are not too much to do the clinical and the research part at the same time.

Publications:

No enough time to fulfill this achievements.

Problems encountered with a critical evaluation of the fellowship experience as a whole:

I think that the problem for me was staying there just for 2 months regarding the fact that I am a person who can adjust easily to any place and situation. I think that I have left a positive print in that hospital and I would really love this experience would be longer.

Future plan on returning to home:

My future plan returning home (Albania) is finish my residency program and trying to go back in Germany.

Overall evaluation and comment of the fellowship:

The best part of this fellowship was having no problems during it. This was partly from them,

being a great staff and partly from me, being a positive person who really need such opportunities to go ahead.

In Tirana. Albania

Date 09/09/14

Applicant's name LEDIANA THANO

Signature:

A handwritten signature in black ink, appearing to read "Lediane Thano". The signature is written in a cursive style with a large, stylized initial 'L' and a prominent flourish at the end.
