

APPLICATION FORM FOR the NATIONAL REPRESENTATIVE OF AUSTRIA

First name:	Maximilian
Last name:	Lanner
Country:	AUSTRIA
Hospital:	Kardinal Schwarzenberg Klinikum Schwarzach im Pongau
Department:	Gynaecology and Obstetrics
Current position:	Consultant

From 2017-2019 I already had the honour to represent my home country within the ENYGO. I started my work for ESGO/ENYGO in 2016 during my residency by co-organising and taking part in Ride4Women, our official cervical cancer awareness project. By participating as a speaker at ENYGO workshops as well as founding the ENYGO webinar series and moderating not only them but also other webinars (Meet the surgeon, COVID-19, etc) I continued my contribution to help improving fellow education and networking. I really enjoyed being part of the ENYGO executive group from 2017 to now and being Vice-president since 2019.

In the future I would love to help establishing an official fellowship programme in my home country. Getting access to all ENYGO projects and involving Austrian fellows in them further helps to improve their education. Through my experience, involvement and contacts within ESGO I believe I could be a good link in between the Austrian fellows and ENYGO. After leaving the EEG in October 2021 I could serve as the NATREP of Austria and continue my work for the Online education committee and webinar series.
