

## APPLICATION FORM FOR the NATIONAL REPRESENTATIVE OF Austria

<b>First name:</b>	<b>Nadja</b>
<b>Last name:</b>	<b>Taumberger</b>
<b>Country:</b>	<b>Austria</b>
<b>Hospital:</b>	University Hospital Graz, Medical University Graz
<b>Department:</b>	Department of Obstetrics and Gynaecology
<b>Current position:</b>	Resident

I have been the national representative of Austria for the past two years and would really love to continue the work. The passion for gynaecologic oncology started early during my time as a medical student and this is why I started to participate in ENYGO workshops and joined the group of ENYGO LiFE Report authors more than three years ago. My passion for medicine and my ambition as well as my well-organized personality and ability to coordinate things helped me support ENYGO as national representative of Austria.

I'm currently at the end of my third year of residency and would be honoured to continue representing Austria for ENYGO and share knowledge as well as draw attention to important issues such as cancer prevention, screening programs, treatment developments and guidelines in gynaecologic cancers.
