

APPLICATION FORM FOR the NATIONAL REPRESENTATIVE OF Belgium

First name:	LISELORE
Last name:	LOVERIX
Country:	BELGIUM
Hospital:	UNIVERSITY HOSPITALS LEUVEN
Department:	GYNAECOLOGICAL ONCOLOGY
Current position:	RESEARCH FELLOW – PHD STUDENT GYNAECOLOGICAL ONCOLOGY

Gynaecological oncology is a very innovative discipline with many unresolved questions. I have a passion for participating in scientific research and proud I have been able to present the results of my own publications and keynote lectures on international conferences. Not only did it boost my scientific curiosity, it also made me aware of the great value of international collaboration.

I am determined to become a competent researcher and physician with a positive impact on the lives of patients and their families. My determination originates from a choice made not only by the mind, but above all from the heart. I am a believer in collaboration to bring research goals into future reality for our patients.

I would like to cover the position of national ENYGO representative for Belgium. I have had the honor in participating in the organization of the ENYGO clinical visits at Leuven. I would enjoy to continue this collaboration in order to further implement and facilitate these initiatives.

As a person I value the opinions of those I represent, I believe that there is a common interest to be considered in order to obtain what is best for all. As a medical student, I was already involved as a representative, this experience has taught me to organize efficiently and contribute constructively in a team. My commitment to both my studies and extracurricular activities has been rewarded twice.

I do hope that, if given the chance, I can be a worthy representative for young Belgian ESGO members.
