Last name:	Petousis
Country:	Greece
Hospital:	Hippokration General Hospital, Thessaloniki, Greece
Department:	2nd Department of Obstetrics and Gynaecology, Aristotle University Of Thessaloniki, Greece
Current position:	Academic fellow

Motivational Statement

It is my personal honour to express you my interest to get elected as Greek National Representative for ENYGO.

ENYGO represents a basic pylon for knowledge expansion in the field of Gynaecologic Oncology for all young colleagues making their initial steps in this subspecialty. I have closely understood the great role of ENYGO for expansion of knowledge since my active involvement in the LiFE project since 2018. My subspecialty education in Institut Bergonie, Bordeaux, France and 2nd Department of Obstetrics and Gynaecology, Aristotle University of Thessaloniki, under the guidance of distinguished Gynaecologic Oncologists, have also permitted me to have a global vision of educational needs and concerns for young physicians having chosen to deal with this wonderful subspecialty.

This experience, along my personal interest to assist colleagues getting actively involved in all educational activities, have lead me to the decision of applying for the aforementioned position. I would therefore kindly like to ask for your support, giving as promise that I will try my best for all Greek colleagues to help them interact with all educational activities of ENYGO and being their personal assistant for anything related with all beneficial ENYGO's actions.
