

APPLICATION FORM FOR the NATIONAL REPRESENTATIVE OF HUNGARY

First name:	Szabolcs
Last name:	Molnár
Country:	Hungary
Hospital:	University of Debrecen
Department:	Department of Obstetrics and Gynecology
Current position:	ob-gyn specialist, trainee in gynaecological oncology

Motivational Statement (250 words)

My name is Szabolcs Molnár. I am working at the Department of Obstetrics and Gynaecology, University of Debrecen. I am currently doing my last year of gynaecologic oncology training, I am the member of our Oncology Care Unit from 2015. My field of special interest is radical ovarian cancer surgery and laparoscopic surgery in gynaecologic oncology.

My goal with the application for national representative is to

- propagate the ESGO/ENYGO membership in Hungary with its advantages, as there are only a few registered members of the ESGO, and
- describe the advantages of ESGO for trainees, such as congresses, huge amount of knowledge in the website and traveling fellowship.
- try to evolve a network in Hungary among trainees for information changing and evaluation of the training system in different departments, with a goal to harmonize and standardize it.
- communication with European trainees in gynecologic oncology to improve the training system in Hungary, try to adopt the well-structured ones.

Beside these I try to propagate widely the ESGO / ENYGO treatment and surgical management standards. In the long term, one of my most important goal is to promote the creation of an ESGO accredited training center that can integrate Hungary into the ESGO network.
