

APPLICATION FORM FOR THE NATIONAL REPRESENTATIVE OF THE NETHERLANDS

First name:	Tineke
Last name:	Vergeldt
Country:	Netherlands
Hospital:	Radboud University Medical Center
Department:	Obstetrics and Gynaecology
Current position:	Fellow Gynaecological Oncology

As our current representative Thijs has finished his fellowship program and is not under the age of 38 anymore, I am happy to take over his position. Currently I am half way through my fellowship, and aged 35 years old, so I can be a representative for a few years (of course, depending on the approval of my Dutch colleagues).

I recently finished the first year of my fellowship program at the Radboud University Medical Center in the Netherlands. For the second year I will travel to the UK, to start my senior fellowship at the Swansea Bay University Health Board in Wales. The ESGO curriculum helps me to determine my goals and monitor my progress, even if my fellowship is divided within two different countries. The eAcademy provides excellent educational resources that can be used internationally.

ENYGO and ESGO are doing a great job in improving and guarantying the quality of gynaecological oncology care. I think it is really important to learn from each other, for instance with the interactive Meet the Surgeon and Tumour Board webinars and the Masterclass. And it is essential to stay up to date, with the LiFE Reports, and by organizing educational workshops.

I would really like to be a part of the ENYGO team, to learn more about all the possibilities, to transfer this knowledge to my Dutch colleagues, and to help the development of the organisation to the next level.
