<b>Current position:</b>	consultant

### Motivational Statement (250 words)

I have been involved with ESGO for the last three years and am currently also in the second year of ESGO Training Programme in Gynaecological Oncology. I feel that the organisation has a great structure and is making a lot of effort to share the knowledge of leading European specialists. Also gynaecological oncology is my passion and I would be honoured to be part of the ENYGO group, also to motivate younger doctors in our region to train in our field and become an active part of our organisation.
