

APPLICATION FORM FOR the NATIONAL REPRESENTATIVE OF Switzerland

First name:	Tibor
Last name:	Zwimpfer
Country:	Switzerland
Hospital:	University Hospital Basel
Department:	Obstetrics and Gynaecology
Current position:	Resident

Dear European Gynaecological Oncology community,

Since I became a trainee in obstetrics and gynaecology, I took every opportunity to take part in training programs as the Young Oncology Academy of the SAKK or the Young Investigator of the GCIG. Further, I had the chance to work with the Gynaecological Research Group of Professor Viola Heinzlmann in basic and clinical research for the last two years at the University Hospital Basel. This allowed me to develop a style I wish to present to ENYGO as the national representative of Switzerland. I am excited to find that my qualifications and personal strengths align with your needs and mission.

As a member of the Working Group Gynaecological Cancer of the SAKK, ESMO and ESGO, I would like to realize my own ideas and pass the same enthusiasm and dedication for translational research over to other young scientists.

I am excited to contribute my talents and proficiency in communication toward the development of ENYGO. As an engaging communicator my focus on building strong professional relationships has been a beneficial asset throughout my young career.

Besides supervising medical students aiming for either master or doctoral thesis I give lectures at the University of Basel and could additionally attend several University Didactic courses. In parallel, I created a Student Course "Basic and advanced laparoscopic techniques". I wish to continue this path and pass on my academic knowledge as well as my practical experience in gynecological oncology.

Thank you for your time and consideration of my candidacy.

Sincerely,

Tibor Zwimpfer
