

CANDIDATE PROFILE

STAMATIOS PETOUSIS, GREECE

ELECTIONS FOR THE ENYGO EXECUTIVE GROUP 2021-2025

Photo

Name: Stamatiou

Last name: Petousis

Country: Greece

Hospital: 2nd Department of Obstetrics and Gynaecology,
Aristotle University of Thessaloniki, Greece

Motivation Statement:

It is an exceptional honor to apply as a candidate for ENYGO Executive Group, after my election as Greek national representative of ENYGO, and therefore kindly request the vote and support of European colleagues for EEG elections.

ENYGO represents the basic pylon of clinical and scientific expression and interaction of young Gynecologic Oncologists. It actually represents the active and vital organizer of multiple scientific actions, setting the education of young physicians in the center of her scope. EEG consists the official organizing moderator of multiple ENYGO actions with an increasing impact on overall ESGO activity.

My potential enrollment as elected member of EEG would actually set two main targets: the further organization and interaction between ENYGO members and national representatives on a more systematic level and the expansion of knowledge between young colleagues through enhancement of multiple educational and clinical activities that ENYGO already successfully performs. Access to theoretical and practical education should always be our priority, therefore, EEG should actually be the basic assistant of every single young colleague to access knowledge. My personal education in ESGO accredited Departments that resulted in the obtainment of ESGO Diploma of European Gynaecologic Oncologist as well as my participation in LiFE Project as author and junior Editor have actually given me both the motivation and the experience to be able to contribute accordingly with previous targets.

Dear ENYGO colleagues and friends, once again, I kindly ask for your support to have the honour being elected as member of EEG and contribute in our common effort to advance level of gynaecologic oncology care.
